REASONS FOR ALLOWANCE

The following is an Examiner's Statement of Reasons for Allowance:

Claims 1-10 and 18-19 are allowed because none of the prior art references of record teaches an ink jet printer head comprising a first adhering portion that adheres to a first exposed edge portion of at least one ejector unit that is different from a first to-be-sealed portion of one surface of the at least one ejector unit; the first adhering portion adheres to a second exposed portion of a cover member that is different from the second to-be-sealed portion of a cover thereof and is adjacent to the first exposed edge portion of the at least one ejector unit, so as to fix the at least one ejector unit and the cover member to each other in the combination as claimed.

Claims 11-21 are allowed because none of the prior art references of record teaches a method of producing an ink jet printer head a step of: adhering and fixing, with a first adhesive, a first exposed edge portion of at least one ejector unit that is different from the first to-be-sealed portion thereof and a second exposed portion of a cover member that is different from the second to-be-sealed portion of a cover thereof and is adjacent to the first exposed edge portion of the at least one ejector unit, to each other, with a first adhesive in the combination as claimed.

Claims 22-24 are allowed because none of the prior art references of record teaches an ink jet printer head comprising at least one sealing portion which seals a first to-be-sealed portion of one surface of at least one ejector unit and a second to-be-sealed portion of a cover member to each other continuously along an entire periphery of at least one first opening of the cover member; at least one first adhering portion which adheres to a first exposed edge portion of the other surface of the at least one ejector unit, and additionally adheres to a second exposed portion of the cover member that is different from the second to-be-sealed portion thereof and is adjacent to the first exposed edge portion of the at least one ejector unit, so as to fix said at least one ejector unit and the cover member to each other; and at least one second adhering portion which adheres to at least the at least one ejector unit, so as to fix the other surface of the at least one ejector unit to the bottom wall of the frame member, wherein the at
